Lincoln MRI To Go Paperless With eRAD PACS

Greenville, South Carolina – January 16, 2009 eRAD, an industry leader in workflow solutions through its native Web-based RIS/PACS and Teleradiology software platform announced today the recent order for eRAD PACS by the Lincoln Imaging Centers of Chicago, Illinois. The installation will include all sites of MRI Lincoln Imaging and Preferred Open MRI.

MRI Lincoln Imaging and Preferred Open MRI are multi-site imaging services providers serving the Chicago area. According to Ms. Hilda Escamilla, Administrator at Lincoln, "We've built quite an image around the way we care for our patients." Escamilla continued, "After an extensive study, we chose eRAD PACS as the system which would help us as we pursue our mission to become filmless and paperless in 2009."

According to Mike Young, Vice President of Client Services for eRAD, "Lincoln joins numerous imaging centers throughout the USA who have chosen eRAD PACS to meet their demanding workflow needs." Young continued, "Lincoln is a particularly interesting implementation which will employ the eRAD Worklist Server configuration with multiple clusters, each having its own study archive and using a shared disaster recovery back-up. Combine this with use of eRAD's integrated speech recognition capabilities and HL-7 interface to a legacy RIS, and Lincoln will have state of the art digital workflow capability, stated Young." Lincoln will be operational with eRAD PACS in early 2009.

About Lincoln MRI

Lincoln Imaging Centers are dedicated to providing patients with the highest quality of care in a friendly, professional and accommodating environment. The diverse needs of the people helped are matched by the full range of services offered at the many Lincoln Imaging facilities. Personal communication with the referring doctor is stressed. Clinical expertise and staff capabilities, along with sophisticated equipment, allows Lincoln to provide excellent and prompt results. Lincoln services reflect a health care approach with a focus on patient comfort and safety, as well as excellent service and physician satisfaction.
