Complete Radiology Reading Services, PLLC Chooses eRAD for Teleradiology Platform

Greenville, South Carolina – February 6, 2009 eRAD, an industry leader in workflow solutions through its native Web-based PACS and Teleradiology software platform announced today it has recently signed an agreement with Complete Radiology Reading Services, PLLC (CRRS) of Westbury, New York to implement its software to power CRRS' teleradiology reading service platform.

CRRS provides off-site general and subspecialty radiology coverage by partnering with hospitals, imaging centers and physician offices to provide access to quality interpretations in an economically efficient manner otherwise not available in traditional delivery models. By focusing its efforts on developing technical skills and knowledge of current state of the art telemedicine systems, workflow, computers, networking and Internet access CRRS has enabled its customers to benefit from seamless access to specialty and subspecialty expertise in all areas of diagnostic imaging regardless of their geography or competitive situation.

According to Allen Rothpearl, M.D., President and CEO of CRRS, "We are making this PACS vendor change because we anticipate continued growth, and we were concerned our previous system could not handle this growth or the support we will require for it. Rothpearl continued, "We chose eRAD after a six month period of evaluating numerous vendors. The choice was made very carefully and it has become clear through the implementation process we have made the right choice."

About eRAD

eRAD was founded in 1999 and offers a standards-based, web-centric image management solution using leading-edge technology. eRAD PACS web-accessible archive, and workflow solutions are installed in over two-hundred thirty customer sites throughout the USA. eRAD's PACS and RIS solutions integrate full-featured RIS/PACS and image management with workflow tools for hospitals, clinics, imaging centers and physician practices.
