## **Physician Healthcare Network Adds State-of-the-Art Image Management System with eRAD PACS**

**Greenville, South Carolina – February 20, 2009** eRAD, an industry leader in workflow solutions through its web-based PACS, RIS/PACS and Teleradiology products, announced today that Physician Healthcare Network, Fort Gratiot, Michigan is now operational with eRAD PACS. Diagnostic images and reports are now readily available within the practice and to outside referring physicians and medical specialists using the eRAD PACS software.

PHCN, serving St. Clair County since 1994, selected eRAD PACS after carefully evaluating a number of alternatives. Concurrent with the PACS implementation, the urgent care facilities implemented the digital conversion of x-ray to computed radiography in five locations. Michigan X-Ray, Inc. of Troy, Michigan was the provider of the CR and the eRAD PACS system.

According to Douglas A. Dolph, Executive Director for Physician Healthcare Network, "We are very pleased that we were able to install the eRAD system as scheduled during our normal course of business without interruption to our practice." Dolph continued, "Installing a fully digital system has increased our efficiency, improved the patient treatment cycle and is enhancing our quality of care."

"Having digital, diagnostic images immediately available facilitates a faster, more effective diagnosis. The tools available in the eRAD PACS prove to be extremely beneficial as compared to traditional film," stated Dr. Igor Nedic, a family practice physician. "In addition, there is also a cost savings realized in film storage and supplies."
