eRAD, Inc. Signs National Teleradiology Provider

February 25, 2008 Greenville, South Carolina – eRAD, Inc., a leading provider of radiology workflow solutions added another significant teleradiology provider to their customer base.

RadiServ, Inc. of Cambridge, MA, a national teleradiology provider with physicians licensed in 44 states, has chosen the eRAD platform to command the technology needs of their physicians and clients. eRAD will empower RadiServ's team of Radiologists to automate the arrival of the study and then provide notification to the facility through the system with the arrival of the report making the workflow seamless. RadiServ works with many imaging centers, hospitals, mobile companies and other teleradiology providers that are already leveraging the Web-based architecture available in the eRAD system.

"eRAD's workflow management and configurability was an ideal fit for RadiServ's business model offering many features not found in competing systems," according to Alpita Shah, President and co-founder of RadiServ, LLC.

About RadiServ

Founded in 2003, RadiServ consists of one corporate office based in Cambridge, Massachusetts, several client sites, and a radiologist team. The radiologist team consists of a group of highly trained and experienced radiology experts equipped with state of the art DICOM technology to examine the radiology images and produce flawless reports.
