## **Northern Ohio Medical Imaging implements eRAD RIS/PACS**

**Greenville, South Carolina – March 22, 2009** eRAD, an industry leader in workflow solutions through its native Web-based RIS, PACS and Teleradiology software platform announced today the recent implementation of eRAD's Integrated RIS/PACS at Northern Ohio Medical Specialists (NOMS Imaging) located in Sandusky, Ohio.

NOMS Imaging is a physician-driven and managed outpatient radiology center comprised of state-of-the-art technology, coupled with 50+ sub-specialty trained radiologists, making it a leader in radiology in the state of Ohio. NOMS Imaging was the forerunner in digital technology in the area and is accredited by the American College of Radiology (ACR), which ensures the highest standards of image quality. All exams are interpreted by sub-specialty, trained radiologists employed by Radiology, Inc. of Columbus, Ohio.

The switch to eRAD was necessitated by the impending closure of Evolved Digital Imaging, Inc., Nashville, TN and required an extensive data migration and accelerated time line for implementation.

According to Debi Manner, Radiology Administrator at NOMS Imaging, "Having previously converted to digital imaging and PACS workflow several years ago, we knew exactly what we were looking for in a system. After careful consideration of several vendors we found eRAD offered a highly functional and integrated RIS/PACS at a cost effective price. Several other vendors required implementation of two separate servers and databases for RIS and PACS even though they were being offered by the same company. Manner continued, "Having gone live on the PACS the feedback from the radiologists who read from several other systems has been two thumbs way up!"

### **About eRAD**

eRAD® was founded in 1999 and offers a standards-based, web-centric image management solution using leading-edge technology. eRAD PACS web-accessible archive, and workflow solutions are installed in over two-hundred twenty-five customer sites throughout the USA. eRAD's PACS and RIS solutions integrate full-featured RIS/PACS and image management with workflow tools for hospitals, clinics, imaging centers and physician practices. For more information, visit [www.erad.com](http://www.erad.com).

### **About NOMS Imaging**

Northern Ohio Medical Specialists (NOMS Imaging) was formed in 2001 by several area physicians who wanted to provide a better healthcare delivery system for their patients. By creating one multi-specialty physicians group, patients have access to a wide range of multi-specialty physicians and are able to utilize radiology services at Northern Ohio Regional Imaging Center. Patients are also provided with the convenience of a single billing statement for all NOMS services by our Central Billing Office. For more information, visit [www.nomsdrs.com](http://www.nomsdrs.com).
