Cherryhill Radiology Goes Live with eRAD PACS

Greenville, South Carolina – August 3, 2010 eRAD, an industry leader in workflow solutions through its native web-based RIS, PACS and Teleradiology software platform announced today that the Cherryhill Radiology of Jackson, Tennessee is now live and serving clients with an eRAD system. Delta Imaging Systems of Nashville, Tennessee was the provider of the system.

Cherryhill Radiology chose the eRAD platform to address the needs of several healthcare providers in west central Tennessee. Consistent with eRAD's uniRAD™ web-based workflow consolidation and interoperability architecture, Cherryhill can seamlessly integrate images, reports and other data from independent, multi-vendor information systems as needed. The system automates the arrival of the study and then provides notification to the client facility when the report is finalized making the workflow seamless. Cherryhill works with imaging centers, clinics and hospitals leveraging the web-based architecture available in the eRAD system.

According to Dr. Trent Borders, Cherryhill Owner and Chief Radiologist, "The individually configurable preferences that the eRAD software provides, along with ease of access from anywhere that I have an Internet connection perfectly fits my business model."

About Cherry Hill Radiology

Founded in 2009, and located about ninety miles northeast of Memphis, Cherryhill's team of highly trained and experienced radiology experts are equipped with state of the art DICOM technology to examine the radiology images and produce flawless reports.

About Delta Imaging Systems

Founded in 1985 by three ex-Philips service engineers, Delta Imaging Systems, Inc. has a long and well deserved reputation as one of the largest and most respected independent capital equipment dealerships in its three-state marketing area. From its home office in Nashville, TN and satellite offices, Delta covers the states of Tennessee, Mississippi, and the Kentucky border area. Its sole focus is outstanding sales and service in the areas of medical imaging capital equipment, teleradiology, computed and digital radiology, and PACS systems. Delta's service reputation has made them consistently the vendor of choice for many facilities, clinics, and imaging centers. They are also widely recognized in the industry for their many innovative ventures in teleradiology, endovascular, and bariatric imaging. For more information on Delta Imaging Systems, Inc., please go to their website: www.deltaimg.com.

About eRAD

eRAD, Inc.® was founded in 1999 and offers a standards-based, web-centric image management solution using leading-edge technology. eRAD PACS web-accessible archive, and workflow solutions are installed in over two-hundred sixty customer sites throughout the USA. eRAD's PACS and RIS solutions integrate full-featured RIS/PACS and image management with workflow tools for hospitals, clinics, imaging centers and physician practices.
