Princeton Regional Orthopedics Adds State-of-the-Art Image Management System with eRAD PACS

Greenville, South Carolina – August 29, 2008 eRAD, an industry leader in workflow solutions through its web-based PACS and Teleradiology products, announced today that Princeton Regional Orthopedics in Princeton NJ, is now operational with eRAD PACS. Diagnostic images and reports are readily available within the practice and to referring physicians and medical specialists using the eRAD PACS software.

Princeton Regional Orthopedics, serving Central New Jersey since 1987, selected eRAD PACS after carefully evaluating a number of alternatives. Concurrent with the PACS implementation, the orthopedic practice implemented the digital conversion of x-ray to computed radiography (CR). Tristar MidAtlantic Imaging, Inc. of Norristown, PA was the provider of the CR and the eRAD PACS system.

According to Mary Agnes Procaccino, Office Manager for Princeton Regional Orthopedics, "Everything was installed on schedule during normal business hours with minimal disruption to our doctors and patients." She added, "Patient turn-around is a high priority here. The level of efficiency and control that the eRAD worklist gives us has exceeded our expectations. Going digital has allowed us to reduce patient wait time and increase our already high quality of care to an even higher level."

Dr. Leon Costa, Founder and senior surgeon stated, "The PACS training was great and I am very pleased with how comprehensive yet easy to use the system is, and the integrated Orthoview™ templating software is a great addition to surgical planning and preparation."

Dr. Michael Grenis joined the practice in 1990 and has a subspecialty in hand surgery. Dr. Grenis commented, "Measurement, magnification, contrast and brightness adjustments enhance my ability to diagnose and treat injuries and at the same time reduce the number of x-rays normally required. Also, we are beginning to really appreciate the benefits of digital storage and the cost savings versus film and chemistry."

About Princeton Regional Orthopedics - Serving the community compassionately for over 20 years, Princeton Regional Orthopedics has provided professional quality care to the community since 1987. Comprised of state-of-the-art equipment and facilities, a team of dedicated professionals offers specialty services devoted to the prevention, diagnosis, treatment and rehabilitation of injuries and diseases of the body's musculoskeletal system. Their services include bone and joint disease evaluation, treatment, and surgery; total joint replacement surgery; arthroscopic surgery; carpal tunnel release; sports medicine; evaluation and treatment of hand and wrist injuries; as well as general and industrial Orthopedics.

About Tristar MidAtlantic Imaging, Inc. - Tristar is a specialized healthcare imaging and marketing company located in the Philadelphia suburb of Norristown, Pennsylvania. Founded in 1993, Tristar specializes in providing digital and analog X-Ray systems, RIS/PACS solutions, radiology supplies and service to hospitals, clinics and private practices in Eastern Pennsylvania, New Jersey, Delaware and Maryland.
