Musculoskeletal Imaging Consultants, Inc. Chooses eRAD PACS

Greenville, South Carolina – September 25, 2008 eRAD, an industry leader in workflow solutions through its native Web-based RIS, PACS and Teleradiology software platform announced today the recent order of eRAD PACS by Musculoskeletal Imaging Consultants, Inc. (MSKIC) of San Antonio, Texas.

Musculoskeletal Imaging Consultants, a provider of orthopedic subspecialty reading services and licensed in 34 states, has contracted with eRAD to install the eRAD platform to command the technology needs of their physicians and clients. MSKIC's principal, Doug Smith, M.D. commented, "eRAD offered the flexible workflow along with many RIS-like features such as integrated Voice Recognition required of our demanding virtual reading environment." Recognizing eRAD's ability to deliver studies 'anywhere anytime,' MSKIC purchased a high-performance, mobile workstation from NextComputing that is designed to match the performance of a standalone workstation while being as portable as a briefcase. The NextDimension series is small enough to hand-carry so you can take your workstation wherever you need it. This, together with eRAD's secure data transfer, makes high-end reading possible from any setting with access to the Internet.

"eRAD is pleased to have Dr. Smith and MSKIC join its growing list of teleradiology providers. This is a win-win scenario; the industry continues to see a trend toward subspecialty remote reading and innovative technologies found in systems like eRAD who continue to make this a cost effective reality," stated Seth Koeppel, SVP of Sales for eRAD. Koeppel continued, "eRAD's Web-based solution offers the same robust, feature rich system to all providers regardless of the reading location."

About eRAD

eRAD, Inc.® was founded in 1999 and offers a standards-based, web-centric image management solution using leading-edge technology. eRAD PACS web-accessible archive, and workflow solutions are installed in over two-hundred twenty-five customer sites throughout the USA. eRAD's PACS and RIS solutions integrate full-featured RIS/PACS and image management with workflow tools for hospitals, clinics, imaging centers and physician practices.
