Open Air MRI of Allentown and Open MRI of Phillipsburg Implement eRAD RIS/PACS

Greenville, South Carolina – December 12, 2008 eRAD, an industry leader in workflow solutions through its native Web-based RIS, PACS and Teleradiology software platform announced today the recent implementation of eRAD's Integrated RIS/PACS at sister facilities Open Air MRI of Allentown in Allentown, PA and Open MRI of Phillipsburg located in Phillipsburg, NJ.

Open Air MRI of Allentown and Open MRI of Phillipsburg are independent, outpatient facilities dedicated to providing high quality, multi-modality diagnostic services in a comfortable, convenient, compassionate and friendly environment. Each site features an Open MRI that caters to the needs of claustrophobic and larger patients while producing ACR accredited images for all studies.

Joseph Galazin, Co-Owner and CEO, "After reviewing several systems available in the market, we made the decision to run our business on the eRAD platform due to the comprehensive nature of the eRAD RIS/PACS platform, workflow that was customized to meet our needs, and an extremely user friendly system." Galazin continued, "In addition, the ability for our radiologists and referring physicians to access the system over the Web utilizing the Internet to read, view studies and reports as well as utilizing integrated voice recognition for expeditious report turnaround time, made this an easy choice."

"In challenging economic times for outpatient centers like Open Air of Allentown and Open MRI of Phillipsburg due to the impact of DRA, centers are seeking increased operational efficiencies available through integrated RIS/PACS and need to do so at an affordable price. eRAD continues to prove its value proposition of comprehensive features/functionality available using cutting edge Web technology at a price that is within reach of facilities of all shapes and sizes," commented eRAD VP of Sales Seth Koeppel.

About eRAD

eRAD® was founded in 1999 and offers a standards-based, web-centric image management solution using leading-edge technology. eRAD PACS web-accessible archive, and workflow solutions are installed in over two-hundred twenty-five customer sites throughout the USA. eRAD's PACS and RIS solutions integrate full-featured RIS/PACS and image management with workflow tools for hospitals, clinics, imaging centers and physician practices.
