

eRAD Scheduler is a significant management tool for unifying radiology workflow. Centrally manage your patient information, procedure schedules, insurance verification and room allocations for single or multiple sites from a single, integrated application. The eRAD scheduling module is available as a standalone application and as an adjunct to eRAD PACS, where it is combined with flexible and reliable image management, diagnostic viewing and reporting tools.

eRAD Scheduler offers:

- Combined view of all modalities and rooms across multiple facilities, assuring optimal use of resources.
- Drag-and-drop technology makes defining and adjusting exam schedules quick and easy.
- A web-enabled infrastructure allows for easy distribution of the tools and automatically delivers user profiles to the user's workstation.
- Patient information management and calendar functions, plus pre-registration, double booking, complex multi-procedure exams, black-out days and times, insurance pre-certification, document scanning, form printing and customized administrative reporting.

Patient and Procedure Data Entry

- Pre-registration
- Data confirmation and correction during check-in and check-out
- Modality Worklist

Procedure Scheduling

- Room allocation blocking
- Double booking
- Complex multi-procedure exams
- Missing data prompts
- Procedure detail conflict alerts

Insurance Verification

- Pre-certification verification
- Multiple payers

Centralized Resource Management

- Single and multiple facilities

PACS Integration

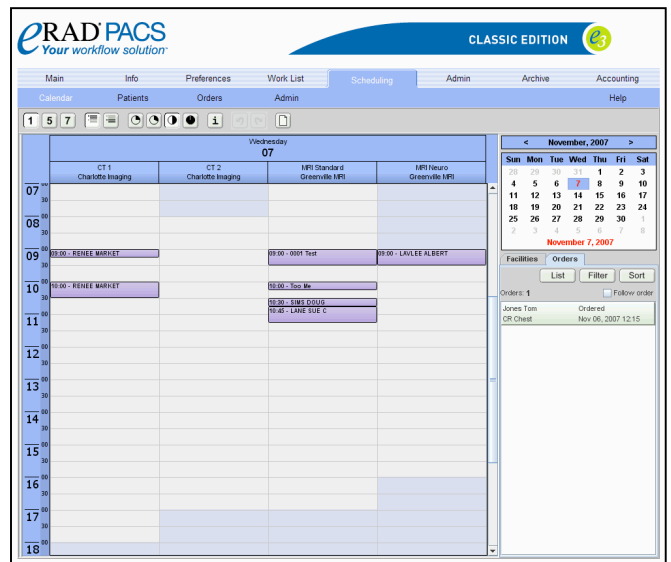

- Database-level integration with eRAD PACS
- Patient history access for previously acquired images and reports
- Provide patient and exam information for DICOM Modality Worklist
- Create DICOM-compatible CD/DVDs or print film

Document Scanning and Printing

- Scan patient ID, insurance and other documents
- Print customized charts and order details

Administration Reports

- Customized reports
- Support for Crystal Reports
